

DMC1304 Tool Case for HD51 Hydraulic Crimping Tool and Dies

INTERIOR

FRONT

The **DMC1304** Tool Case contains the manual HD51 Hydraulic 5.5 Ton Crimping Tool and HD51-130-1 and HD51-132-2 Die Halves.

These tools are supplied in a steel case and includes: Name Plate, Foam Tool Cavities, and Contents Charts.

HD51 Medium Duty Hydraulic Crimper is the most popular hand operated hydraulic crimper. The **HD51** is still lightweight at 4.6 pounds, but the 5.5 tons of force and the larger die configuration extends the range of crimping capabilities to 2/0 AWG conductors in many applications. The **HD51** Hydraulic Crimper utilizes rugged construction, lightweight materials, and comfortable handle grips for the best ergonomic advantage. The number of handle closures required to complete the crimp is reduced by the larger and more efficient hydraulic pump system. Other features are the following:

- Length: 14 inches (356 mm)
- Weight 4.6 pounds (2.08kg)
- Crimp force: 5.5 tons (48.93kN)
- Automatic relief valve to prevent over-compression
- Release lever for relaxing crimp pressure and opening dies
- 180° rotating head for ease in confined work areas.
