# DMC1340 WIRING SYSTEM SERVICE KIT For the T-6A Texan II

### THE MAINTENANCE PROBLEM...

Modern aircraft, such as the T-6A, have complicated electrical wiring systems containing many different connectors, contacts and terminals, the repair of which require precision tools.

### THE DMC SOLUTION...

## for the T-6A Texan II

#### IMMEDIATE AVAILABILITY OF TOOLS AND TECHNICAL INFORMATION.

DMC Wiring System Service Kits provide, in a single, well organized location, the tools necessary to strip, crimp, install and remove the typical contacts and terminals of this wiring system. The DMC1340 kit contains the tooling to connector, contact and terminal cross reference information which indicate the particular tool(s) that should be selected to repair a specific connector, contact, or terminal. In addition, the kit also contains illustrated operating instructions for the required tooling.

ALL IN ONE. Since these tools, together with their operating instructions, are contained in a single kit, the connector repair can be made in the shortest time possible, thus permitting a rapid return of your Light Armored Vehicle to service. This tool kit is supplied in 2 environmentally sealed fiberglass cases and includes: Name Plate, Foam Pads/Inserts, Contents

Charts, Instruction Charts, and Tool Selection

Charts.

NOTICE: Whenever possible, DMC designs its commercial kits around MIL-Spec and/or readily available commercial tools compatible with the components of the wiring system. These tools may not necessarily be the tools listed in a manufacturer's manual.

MIL-T-81714	Terminal Junctions			
MIL-T-7928	Insulated/Non-Insulated Terminals			

NOTICE: Unless otherwise stated by DMC; tools contained in this kit have been selected based upon their suitability to service the related connector or contact indicated. Military Standard tools have been utilized wherever possible. These tools are not necessarily the production tools used to manufacture the vehicle and therefore, these tools may or may not correspond to the tools listed in the OEM wiring manual list of approved tooling. Verification Is Required.

TOOL KIT CONFIGURATION				
Type of Case	Portable			
Number of Cases	2			
Color	Green			
Type of Construction	Fiberglass/Aluminum			
Application	T-6A Texan II			
Coverage	Airframe Power Connectors			
	Terminals size 12 AWG and Smaller			
	Coaxial Connectors			
Type of Inserts	Unicellular Polyethylene Foam with Die Cut Tool Cavities
