

# DMC1632 TOOL KIT

**DESCRIPTION:** The DMC1632 was developed to supply the test leads necessary to check continuity, voltage and to isolate electrical malfunctions in the various F-16 wiring harnesses. The DMC1632 supplies only the test leads. No meters or testers are included. It is packaged in a durable polyethylene carrying case with foam inserts, laminated instruction sheets permanently attached on a ring binder, and contents charts identifying the location and quantity of each product.
