

DMC2061 WIRING SYSTEM SERVICE KIT

For the MQ-9 REAPER (UAV)

DMC2061 for the MQ-9 Reaper (UAV)

The DMC2061 electrical connector maintenance kit contains the crimp tools, turret head, positioners, gages, and insertion/removal tools necessary to service the MQ9 Wiring System.

The DMC2061 kit also supplies your staff with the information to select and use the tools necessary to repair the covered connectors.

It is not a cost effective use of the time of your technical staff to start from scratch and try to become intimately knowledgeable about which precision tools must be used to repair each electrical connector, contact and terminal. So DMC has cross referenced these tools to the connector series covered and the contacts they use for you. This information is contained in an easy to read tool selection chart.

In addition, the DMC2061 kit contains illustrated operating instructions for all the tooling included.
