

DMC2225 COAX Cable Prep and Termination Tool Kit

The DMC2225 contains the tools needed to install crimp connectors on LMR400 Cable.

The packaging materials (ABS case, foam inserts, and laminated instructions) are manufactured to meet the most demanding handling conditions. FOD (Foreign Object Damage) is always a concern when workers are required to use tools and small components in or around an aircraft. The “shadowing” principal is a proven concept for Tool/ parts control to minimize that concern.

DMC is well known throughout the aerospace industry for the quality and capability of the Tool Kits that we manufacture. If you have specific needs that cannot be covered by the Tool Kit described here, please call a DMC customer service representative for information on a Kit that will more appropriately meet your requirements.

DMC2225 TOOL AND ACCESSORY LIST
