

DMC775 WIRING SYSTEM SERVICE KIT

For the Embraer EMB-312 Tucano

**DMC775 for the
Embraer EMB-312 Tucano**

THE MAINTENANCE PROBLEM...

Modern aircraft, such as the Embraer EMB-312 Tucano, have complicated electrical wiring systems containing many different connectors, contacts and terminals, the repair of which require precision tools.

It is not a cost effective use of the time of your technical staff to start from scratch and try to become intimately knowledgeable about which precision tools must be used to repair each electrical connector, contact and terminal when DMC has already performed this task for the Embraer EMB-312 Tucano.

AOG TIME CONSTRAINTS. Once the aircraft becomes inoperable because of a connector failure, it is imperative to be able to replace the connector, contact or terminal as quickly as possible to avoid revenue loss due to AOG. The DMC775 kit supplies your staff with both the information and the tools necessary to make this type of repair to the Embraer EMB-312 Tucano in the shortest time possible.

THE DMC SOLUTION...

TOOLING RESEARCH. DMC has already researched the list of connectors for the Embraer EMB-312 Tucano and has identified the most common tools required to maintain the electrical connectors in the aircraft. DMC has cross referenced these tools to the connectors, contacts and terminals, eliminating costly and time-consuming research which would otherwise have to be performed by your electrical technicians.

IMMEDIATE AVAILABILITY OF TOOLS AND TECHNICAL INFORMATION. The DMC775 kit contains all of the tooling to connector, contact and terminal cross reference information needed to support the Embraer EMB-312 Tucano. In addition, the DMC775 kit also contains illustrated operating instructions for the required tooling.

ALL IN ONE. Since all of these tools, together with their operating instructions, are contained in a single kit, the connector repair can be made in the shortest time possible, thus permitting a rapid return of your aircraft to service.

Actual Kit may vary from example shown.
