

DMC782 MAINTENANCE KIT

For MIL-C-28840 Electrical Connectors

DMC782 KIT for MIL-C-28840 Connectors

Actual Kit may vary from example shown.

The DMC782 electrical connector maintenance kit contains the crimp tool, positioner, gage, and insertion/removal tools necessary to service MIL-C-28840 connector.

It is not a cost effective use of the time of your technical staff to start from scratch and try to become intimately knowledgeable about which precision tools must be used to repair each electrical connector, contact and terminal. The DMC782 kit supplies your staff with both the information and the tools necessary to repair the MIL-C-28840 connector.

DMC has cross referenced these tools to the MIL-C-28840 connector and the contacts it uses, eliminating costly and time-consuming research which would otherwise have to be performed by your electrical technicians. This information is contained in an easy to read tool selection chart.

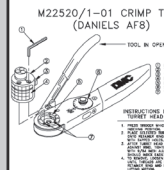

In addition, the DMC782 kit contains illustrated operating instructions for all the tooling included.

DMC782 TOOL AND ACCESSORY LIST		
	1	Crimp Tool M22520/34-01
	1	Positioner
	2	Insertion Tweezers
	1	Removal Tweezer
	1	In-Service Inspection Gage
