

CUSTOMISED TOOL KITS

Bring order, compliance and safety to your workspace!

The RIGHT TOOLS in the RIGHT PLACE!

Superior Kits Customised for Your Wiring System

Crimp-Tech Australia Tool Kits have provided complete wire harness solutions for mission-critical, high-performance industries including military and commercial aviation for over 35 years. Equipped with the highest quality tools qualified to meet military specifications for stripping, crimping, and terminating wire; our tool kits offer a unique advantage that takes the guesswork out of producing superior wire harnesses.

We are offering quality tools, kiting, foam inlays for your existing cases, roller cabinets or new requirements. With our light panel and unique software, we can scan your existing tools, either onsite or in our facility to produce foam inlays for your tools. With the option of onsite tool scanning, your tools are available should they be required.

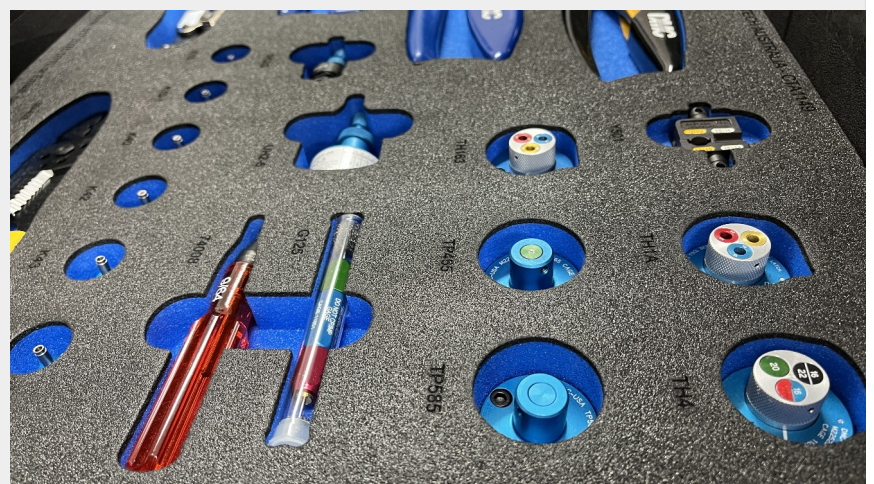

We exclusively use Zotefoam products because they are the purest polyethylene foam manufactured in the world today. AZOTE is the group brand name for Zotefoam's closed-cell, cross-linked polyolefin foam. It is high quality foam from differing base polymers that are all manufactured using the same unique nitrogen expansion process route.

Plastazote foam is engineered to offer superior performance and lighter weight. The absence of any chemical agents in the foam and a consistency of cell structure and density allows Zotefoam to offer the world's lightest cross-linked foam. The lack of any chemical agents allows Plastazote to withstand destructive materials such as Skydrol which is used throughout the aerospace industry. Our standard foam for Industrial applications is Zotefoam LD45 which is a closed cell/cross linked polyethylene foam.

Zotefoam is closed cell and cross-linked polyethylene foam: This means the material does not absorb moisture and can be cleaned in a part cleaner or with aggressive solvents.

What we offer:

- Customised
- FOD Control
- Free Design
- Tool Workflow
- Laser Text
- Magnets
